SailPoint Announces Integration with CrowdStrike Falcon Next-Gen SIEM

August 31, 2026

New integration brings SailPoint identity governance and access data into Falcon Next-Gen SIEM to enrich investigations and accelerate threat response for all identities – human, machine, and AI agent

LAS VEGAS, Aug. 31, 2026 (GLOBE NEWSWIRE) -- **Fal.Con 2026 –** SailPoint, Inc. (Nasdaq: SAIL), a leader in enterprise identity security, today at Fal.Con 2026 announced an expansion of its partnership with CrowdStrike, bringing SailPoint SecOps Identity Intelligence into CrowdStrike Falcon® Next-Gen SIEM to enrich investigations with identity governance and access context and accelerate threat detection and response.

Falcon Next-Gen SIEM unifies security data across the enterprise to give SOC teams the context they need to detect, investigate, and respond to threats at speed. The new integration brings SailPoint identity governance and access data into Falcon Next-Gen SIEM, enabling security teams to correlate SailPoint insights with endpoint, identity, cloud, and other security telemetry in the Falcon platform. By bringing this additional context directly into existing SOC workflows, analysts can investigate identity-related activity faster and take action without moving between disparate tools.

Chandra Gnanasambandam, EVP of Product and Chief Technology Officer at SailPoint, said:
"Identity has become a critical part of the modern attack surface, making it essential for security teams to understand who has access to what when investigating potential threats. By bringing SailPoint's identity intelligence into CrowdStrike Falcon Next-Gen SIEM, we're giving joint customers additional context directly within their existing security workflows, helping them investigate identity-related risk and respond faster."

With SailPoint SecOps Identity Intelligence integrated into Falcon Next-Gen SIEM, joint customers can:

- **Enrich security investigations with identity context:** Bring SailPoint identity governance, access, and risk data for all human and non-human identities into Falcon Next-Gen SIEM to provide analysts with additional context during investigations.
- **Correlate data across the security environment:** Analyze SailPoint data alongside endpoint, identity, cloud, threat intelligence, and other third-party telemetry in Falcon Next-Gen SIEM.
- **Accelerate investigation and response:** Give SOC teams identity and access context directly within Falcon workflows, reducing manual investigation and helping analysts respond faster.

SailPoint SecOps Identity Intelligence is now available on the CrowdStrike Marketplace. To see the integration in action, visit SailPoint at CrowdStrike Fal.Con at booth #1754.

About SailPoint
SailPoint (Nasdaq: SAIL) is defining the new era of adaptive identity security. In a world where non-human identities now significantly outnumber humans, our AI-powered platform unifies identity, security, and data intelligence to protect today's enterprise from advanced identity-based threats. We deliver the identity solution that spans both the breadth of identities and the depth of context needed to drive real-time access with confidence. Built on principles like zero-standing privilege and contextualized risk, our SailPoint platform transforms identity from a point of vulnerability into a powerful security advantage. Trusted by many of the world's leading organizations, SailPoint secures the enterprise with intelligent, autonomous identity security.
